

EUDRACAP® enteric

Optimize gastric resistance. Boost intestinal absorption.
Enhance bioavailability.

An effective enteric coating solution

EUDRACAP® enteric is designed to optimize gastric resistance and improve absorption for drug products targeted for release in the upper small intestine. The high-quality HPMC capsules feature a precisely tailored functional coating that is well accepted by many key regulatory bodies around the world. US-DMF is available.

Easy to open and close on standard equipment

EUDRACAP® enteric capsules can be easily opened and closed on standard manual and automatic capsule filling systems. Various forms can be efficiently filled including powders, pellets and granules.

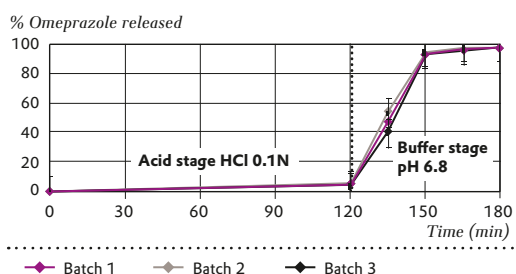

Reliable protection and precise, rapid release

Dissolution testing (right) confirms that no drug release occurs during the acid stage (HCl 0.1N). After conversion to the buffer stage at pH 6.8, rapid release begins immediately, with excellent reproducibility across all tested batches.
